SEAL TIGHT SOLUTIONS, INC.

Certification of Tax Credit Compliance

This letter is to certify that the STS Pro-Shield Plus Liner meets the qualifications for the Tax Credit. This assumes that the aforementioned products are for the taxpayer's existing primary residence and placed in service from January 1, 2009 through December 31, 2010.

The STS Pro-Shield Plus Liner meets the International Energy Conservation Codes as well as the International Code Council's building codes. STS Pro-Shield Plus Liner comes with a 25 year guarantee.

About the HERS Index, Energy Star and RESNet

Reflective insulation helps meet requirements for the Home Energy Rating, or HERS Index requirements, which are part of Energy Star. The HERS Index, established by the Residential Energy Services Network (RESNet) involves an analysis of a home's construction plans and an onsite inspection. A home built to the specifications of the HERS Reference Home scores an index of 100. A zero-energy home scores a HERS index of 0. The lower a home's HERS Index, the more energy efficient it is in comparison to the reference home. Reflective insulation contributes to this score because it provides the envelope with thermal resistance and has an average value of 3 points.

Other Important Tax Information

Improvements made in 2009 will be claimed on your 2009 taxes (filed by April 15, 2010). Use IRS Tax Form 5695 (2009 version), which will be available late 2009 or early 2010.

The maximum total amount that can be claimed for all products for most home improvements is \$1500.00. Geothermal heat pumps, solar water heaters, solar panels, fuel cells and windmills are not subject to this cap.

It is not necessary to submit a copy of this Certificate, but you must keep a copy for your records.
